SEBASTIÁN AYALA-RUANO

I am a researcher and freelance data scientist with six years of experience in **Bioinformatics** and **Cheminformatics** at various laboratories. My current research interests are centered on **network science**, **deep learning**, and **software development** to study complex biological systems. I am an active member of several research, open-science, and software development communities (The Turing Way, Open Life Science, Streamlit Creators, ISCBSC, and The Carpentries) and have led initiatives that advance Bioinformatics in Ecuador and Latin America.

EDUCATION

2024 | 2022

MSc, Systems Biology

Maastricht University (UM) — Maastricht, the Netherlands

- **Scholarship**: UM Holland-High Potential Scholarship (non-EU/EEA students).
- **GPA**: 8.78/10 (Cum Laude) - highest score in the Systems Biology 2024 class.
- **Thesis** (MaCSBio thesis award): MicW2Graph - Building a knowledge graph of the wastewater treatment microbiome and its biological context.

2020 | 2016

B.Eng., Biotechnology

Universidad San Francisco de Quito (USFQ) — Quito, Ecuador

- **Minor**: Software engineering.
- **GPA**: 3.78/4 (Magna Cum Laude) - second highest score in the College of Biological and Environmental Sciences 2020 class.

WORK EXPERIENCE

Sep. 2025 | Oct. 2024

Research Assistant

Multi-omics Network Analytics Group - Novo Nordisk Foundation Center for Biosustainability, Technical University of Denmark — Copenhagen, Denmark

- Contributed to the development of Bioinformatics software tools, including VueGen, VueCore, and ACore, a suite of Python packages that automate report generation, visualization, and analytics for multi-omics data.
- **Advisor**: Alberto Santos Delgado

May. 2024 | Nov. 2023

Research Intern

Multi-omics Network Analytics Group - Novo Nordisk Foundation Center for Biosustainability, Technical University of Denmark — Copenhagen, Denmark

- Investigated the wastewater treatment microbiome and developed MicW2Graph, an open-source knowledge graph integrating metagenomic and metatranscriptomic data with their biological context, including biological processes, environmental features, chemical compounds, and additional metadata (More details).
- **Advisors**: Alberto Santos Delgado, Martina Kutmon

Oct. 2022 | Apr. 2022

Data Science Consultant

Universidad de Las Américas — Quito, Ecuador

- Created a curated database of 50,000 herbarium records from tropical forest species of the Americas using web scraping and the Global Biodiversity Information Facility API.
- Developed machine learning classifiers to predict the phenological stages of forest species from herbarium records, supporting the design of conservation strategies for tropical forests (More details).

SKILLS

Technical

Programming Languages:

python, R, BASH, C++, Java

DevOps:

GitHub, git, docker

Data Science:

jupyter, python, R

Databases and Cloud:

MySQL, PostgreSQL, Firebase, neo4j

Languages

Spanish: Native

English: Advanced | C1 | TOEFL iBT 109

The source code is available at sayalaruano/cv.

Last updated on 2025-09-23.

2021

Research Assistant

Applied Signal Processing and Machine Learning Research Group - USFQ

Quito, Ecuador

- Created a method based on network science and similarity searching to explore the chemical space of antiparasitic peptides and discover new drugs (More details).
- **Advisors**: Yovani Marrero-Ponce, Noel Pérez Pérez

2020 | 2017

Research Intern

Computational and Theoretical Chemistry Group - USFQ

Quito, Ecuador

- Studied binding specificity between repressor proteins and a transcriptional factor in the jasmonic acid pathway of *Arabidopsis thaliana* using molecular dynamics simulations and machine learning algorithms (More details).
- **Advisor**: Miguel Angel Méndez Silva

2020 | 2018

Research Intern

Bio-Chemoinformatics Group - Universidad de Las Américas

Quito, Ecuador

- Investigated the impact of horizontal gene transfer in the genome of *Streptomyces clavuligerus* using phylogenetics, and other bioinformatics tools (More details).
- Proposed molecular mimicry between Zika envelope protein and human neuronal proteins through molecular dynamics and protein-protein interaction networks.
- **Advisors**: Vinicio Armijos, Yunierkis Perez

2019

Research Intern

Tumor Metabolism and Therapeutic Oncology Laboratory - Gwangju Institute of Science and Technology

Gwangju, South Korea

- Performed density functional theory and molecular dynamics simulations to study the effect of a mutation in the ZN domain of the CRBN protein (More details).
- **Advisors**: Miguel Angel Méndez Silva, Steve K. Cho

TEACHING EXPERIENCE

2021

Bioinformatics Boot Camp Co-organizer and Co-instructor

RSG Ecuador and iGEM Ecuador

Virtual

- Designed and taught course materials covering Linux basics, terminal usage, Bash/AWK scripting, and Git/GitHub.

2020

Undergraduate Teaching Assistant

Learning Center - USFQ

Virtual

- Provided online mentorship in Biotechnology, Mathematics, and Engineering subjects to undergraduate students.

2018 | 2016

Undergraduate Teaching Assistant

General Biology Laboratory - USFQ

Quito, Ecuador

- Graded reports, tests, and homework, providing feedback and guidance on course topics.

SELECTED PRESENTATIONS

- *VueGen: Automating the creation of scientific reports*. (2025). Oral presentation. **Bioinformatics Open Source Conference (BOSC) - ISMB/ECCB 2025**.
- *MicW2Graph: Building a knowledge graph of the wastewater treatment microbiome and its biological context*. (2025). Oral presentation. **Conference on Complex Systems 2025**.
- *Contributing Guidelines and Codes of Conduct for Open Projects*. (2022). Expert talk. **6th cohort of Open Life Science**.
- *Exploring the chemical space of antiparasitic peptides and discovery of new leads using network science and similarity searching*. (2022). Oral presentation. **International Society for Computational Biology Student Council Webinar series**.
- *HerrCompBioinfo: An open-source educational resource of computational tools for Bioinformatics enthusiasts written in Spanish*. (2022). Oral presentation. **4th cohort of Open Life Science Graduation**.
- *The molecular basis of JAZ-MYC coupling, a protein-protein interface essential for plant response to stressors*. (2021). Oral presentation. **6th Brazilian Student Council Symposium: Omics and Data Science**.
- *In silico detection of horizontal gene transfer in Streptomyces clavuligerus*. (2020). Oral presentation. **International Society for Computational Biology Student Council Webinar series**.
- *Structural changes due to a mutation in Cereblon might be a cause for intellectual disability*. (2019). Poster presentation). **Global Intern Program - Gwangju Institute of Science and Technology**.

HONORS AND AWARDS

2024

MaCSBio Thesis Award

Maastricht University — Maatricht, the Netherlands

- Recognizes one MSc System Biology thesis based on scientific merit, thesis quality, and academic performance.

2024

Visit Grant

Danish Data Science Academy — Copenhagen, Denmark

- Covered travel and accommodation expenses for MSc thesis internship.

2024 | 2022

Cum Laude Graduation Distinction

Maastricht University — Maatricht, the Netherlands

- Awarded to students with a GPA ≥ 8/10.

2022

UM Holland-High Potential Scholarship

Maastricht University — Maatricht, the Netherlands

- Full scholarship covering tuition and stipend support for highly talented non-EU students admitted to a master's program.

2021

Best oral presentation award

6th Brazilian Student Council Symposium: Omics and Data Science — Virtual

2021

"For More Data on Labor Informality" Innovation Challenge Award

Datalat, PNUD Ecuador, UN Women Ecuador, and the International Labour Organization — Virtual

- Selected among 39 proposals from 80 interdisciplinary teams to design a technological solution for collecting labor informality data in Ecuador (More details).

2020 | 2016

Chancellor's Honor List and Magna Cum Laude Graduation Distinction

Universidad San Francisco de Quito — Quito, Ecuador

- Recognized students with a GPA ≥ 3.7/4.

2020

Third HPC Summer School Colombia: Bio and Data Science scholarship

CyberColombia — Virtual

- Covered registration expenses for the event.

2019

2nd RSG-Colombia Symposium travel award

RSG Colombia — Ibagué, Colombia

- Covered travel expenses to attend the event.

2019

Global Intern Program Scholarship

Gwangju Institute of Science and Technology — Gwangju, South Korea

- Covered accommodation and stipend for an 8-week research internship with training and mentoring.

LEADERSHIP AND SERVICE

Current | 2022

Streamlit Creators Program

Streamlit — Virtual

- Developed multiple web applications using the Streamlit Python package and became part of the creators community.

Current | 2021

Open Life Science (OLS) program

Open Life Science — Virtual

- Led the HerrCompBioinfo project during the 4th cohort, creating an open-source educational resource of computational tools for Bioinformatics enthusiasts written in Spanish.
- Mentored a team in the 5th cohort to create a computer vision tool for improving cancer diagnosis in Cameroon.
- Delivered a talk about contributing guidelines and codes of conduct for open projects in the 6th cohort.

2023 | 2020

Regional Student Group (RSG) Ecuador

International Society for Computational Biology Student Council — Virtual

- Co-founder, built a community of Bioinformatics students and researchers in Ecuador.
- Co-chair of the 1st Ecuadorian-Venezuelan Symposium of Young Bioinformatics Researchers.
- Fellowship committee chair, 17th Student Council Symposium.
- Contributed to the program and fellowships committees of the 4th ISCB Latin American Student Council Symposium.

2021

Saturdays.AI Quito 2021

Saturdays.AI Quito — Virtual

- Led a project developing a maize disease detector based on convolutional neural networks.

Note: I have developed additional personal projects related to Data Science, Machine Learning, and Bioinformatics.
